

Bhavan's Tripura Vidyamandir1st Terminal Examination 2024-2025**Class:- 11**

Time:- 3 Hours

Name of the student :

Subject:- Geography

Total :- 70 Marks

Roll: Stream:

GENERAL INSTRUCTION:-

All questions are compulsory to attempt. However some internal choices are provided.

- This question paper contains 30 questions. All question are compulsory to attend.
- This question paper is divided into 4 sections i.e, A, B, C, D and E.
- Section A, question number 1 to 17 are multiple choice question of 1 mark each.
- Section B, Question number 18 and 19 are source based question carrying 3 marks each.
- Section C, question number 20 to 23 are short answer type carrying 3 marks each and should be written with in 30 words.
- Section D, question number 24 to 28 are long answer type each carrying 5 marks.
- Section E, question no. 29 is the identification of the location each carrying 1 mark and question no. 30 carries 1 mark for locating and labelling each geographical location on the provided political map of India.

SECTION - A**1X17 = 17**

- According to Wegener, Pangae was drifted into two land forms namely:
 - Ocean and continents
 - Laurasia and Gondwaland
 - Panthalasa and Continent
 - Pangea and ocean
- The mantle contains a weaker zone called
 - Lithosphere
 - Nife layer
 - Asthenosphere
 - None of the above
- Consider the following statement
Assertion (A): The earth's crust is dynamic
Reason (R): The differences in the internal forces operating from within the earth which built-up the crust have been responsible for such variations in the outer surface of the crust.
Choose the correct option
 - Both (A) and (R) are true and (R) and are is the correct explanation is (A)
 - Both (A) and (R) are true but (R) is not the correct explanation of (A)
 - (A) is true but (R) is false.
 - (A) is false but (R) is true.
- Gorge, waterfalls, v – shaped valleys and rapids are associated with which of the following stages of rivers
 - Mature
 - Old
 - Youth
 - Intermediate
- Which of the following statement is true about incised meanders?
 - Meander loops develops over original gentle surface in the initial stage of development of streams.
 - Meandering is not an example of erosional landforms.
 - Meandering can be found over flood plains and delta plains.
 - Very deep and wide meanders can also be found cut in soft rocks.

Choose the correct option.

 - Only I
 - Only iv
 - Both i and iii
 - i, ii, iii and iv

6. A water body that separates Andaman and Nicobar islands is:
 a. 9° channel b. 11° channel c. 12° channel d. 10° channel
7. Which of the following rivers is known for its riverine island and Sandbars?
 a. Ganga b. Yamuna c. Brahmaputra d. Indus
8. Name the fault line that separates north-east from the peninsular plateau region
 a. Delhi ridge b. Malda fault c. Raj mahal hill d. Mahadeo hill
9. Arrange the name of the states capitals chronologically through which Tropic of cancer passes and chose the correct option.
 i. Gandhinagar ii. Bhopal
 iii. Jaipur iv. Raipur
 a. i, iii, ii, iv b. i, ii, iii, iv c. i, iii, iv, ii d. i, iv, iii, ii
10. What is the correct definition of drainage basin?
 a. An area drained by a river and its tributaries
 b. A boundary line separating one drainage basin from the other
 c. The catchment of large river is called drainage basin
 d. The flow and collection of water in a specific area.
11. The earth's radius is _____ km
 a. 6670 km b. 6370 km c. 6270 km d. 6170 km
12. The point where the energy is released is called as :
 a. Hypocentre b. Focus
 c. Both a and b. d. Neither a nor b.
13. Consider the following statement
 Assertion (A): The continental drift theory was put forward by Abraham Ortelius in 1913.
 Reason (R): A German meteorologist who has provided evidences like Jig-Saw fit, tillite, Placer deposits etc.
 a. Both (A) and (R) are correct and (R) is the correct explanation of (A).
 b. Both (A) and (R) are correct but (R) is not the correct explanation of (A)
 c. (A) is correct (R) is wrong
 d. (A) is wrong but (R) is correct
14. Crescent shaped dunes are called as :
 a. Barchans b. Self c. Longitudinal d. Parabolic
15. A fertile and swampy belt that offers a luxurious growth of natural vegetation and also a house to varied wildlife
 a. Bhabar b. Khaddar c. Bhangar d. Tarai
16. Which of the following river is considered as the largest in peninsular?
 a. Ganga b. Cauvery c. Mahanadi d. Dakshin ganga
17. Which of the following question is related to distribution of natural and cultural features of the earth's surface?
 a. Where b. What c. Why d. None of the above

SECTION - B

3X2 = 6

18. Analyze the picture carefully and answer the following questions.

18.1. Identify and name the features marked in point A and B

18.2. Identify and name the figure life features marked in point C and also describe one special features of it?

19. Read the following passage carefully and answer the following question.

The Lava (known as magma inside the mantle) that is released during volcanic eruption on cooling develops into igneous rocks. The cooling may take place either in reaching the surface or while lava is still in the crystal plain. Depending on the location of cooling igneous rocks are classified as volcanic rocks (cooling at the surface) and plutonic rocks (cooling in the crust) which has various intrusive forms.

19.1. What is the term associated with hot molten rocks that is stored in the Earth's crust before it comes out in the form of lava?

19.2. Name the two classification of igneous rocks and mention one difference of it.

SECTION - C

4X3 = 12

Short answer type questions. Word limit (Not more than 50-60 words)

20. Difference between Dendritic and Trellis drainage pattern?

21. Mention the boundaries of the Peninsular block?

22. Explain the uppermost layers of the earth's crust?

23. Write a short note on river terraces with the help of a diagram?

Or

Why does the earth shake?

SECTION-E

Long answer type questions : (150 words)

5X 5 = 25

24. Make a comparison of the island groups of the Arabian sea and the Bay of Bengal?
25. What is continental drift theory according to Wegener? List out some evidences in support of the continental drift?
26. Write a short note on Stalactites, Stalagmites and Pillars with the help of a diagram?
27. Explain briefly the structure of the earth with the help of a diagram.
28. Differentiate between the western coastal plain and eastern coastal plain?

Or

Name the different boundaries that formed as a result of tectonic plates. Explain each of the boundaries?

SECTION - D

5X2 = 10

29. On the given political map of the world identify and mention the name of the following 5 information.
 - a. A plate between central America and Pacific plate
 - b. A plate between South America and Pacific plate
 - c. A plate mostly in the Saudi Arabian landmass.
 - d. A plate between Asiatic and Pacific plate
 - e. A plate between Philippine and Indian Plate.
 - f. A plate located in Pacific Ocean.
30. On the given political outline map of India locate and mention the name of the following five information:
 - a. The longest westward flowing river
 - b. The sorrow of Bengal
 - c. The largest tributary of Ganga
 - d. The highest mountain peak near Sikkim
 - e. A water body that separates India and Sri Lanka.
