

Bhavan's Tripura Vidyamandir1st Terminal Examination: (2024 –2025)**Class:- 6**

Time:- 3 hours

Subject: English

Total: - 80 Marks

Name of the student:

Roll:

Sec:

Reading Section - 10 Marks**A. Read the passage carefully and answer the following questions:****(1X5 =5 Marks)**

What causes the monsoon? The monsoon, which is essentially the seasonal reversal in wind direction, causes most of the rainfall received in India and some other parts of the world. The primary cause of monsoons is the difference between annual temperature trends over land and sea. The apparent position of the Sun with reference to the Earth oscillates from the Tropic of Cancer to the Tropic of Capricorn. Thus the low pressure region created by solar heating also changes latitude. The northeast and southeast trade winds converge in this low pressure zone, which is also known as the Intertropical Convergence Zone or ITCZ. This low pressure region sees continuous rise of moist wind from the sea surface to the upper layers of the atmosphere, where the cooling means the air can no longer hold so much moisture resulting in precipitation. The rainy seasons of East Asia, sub-Saharan Africa, Australia and the southern part of North America coincide with the shift of ITCZ towards these regions.

1. Monsoon is

(a) A type of sea wave

(b) a seasonal reversal in wind direction

(c) very hot wind

(d) veiy cold wind.

2. What is the full form of ITCZ?

(a) Intertrance Convergence Zone

(b) Intertropical Convergence Zone

(c) Intertropical Capricorn Zone

(d) Intertropical Conveyance Zone.

3. The major cause of monsoon is the

(a) difference between annual temperature trends over land and sea

(b) difference between day and night temperature

(c) moisture in the atmosphere

(d) None of these.

4. Low pressure region is created by

(a) solar heating

(b) lunar cooling

(c) moist wind

(d) dry wind.

5. It rains when

(a) moist wind goes down

(b) dry wind meets moist wind

(c) the air can no longer hold moisture resulting in precipitation

(d) annual temperature goes down.

B. Read the passage carefully and answer the following questions:**(1X5 =5 Marks)**

Bees are insects. Bees are special insects because they can fly! They can move through the air like an aeroplane! Bees can fly because they have wings. They use their wings to fly. Bees can fly fast. Bees can also fly slow. They can fly up and they can fly down. They need to fly to get to the flowers! Bees can have three colours. They can be yellow, red, and orange. All bees are black in some places. Bees have three main parts. They have a head. They have a body. And, they have a

stinger. The stinger is used to defend against enemies. They also have six legs. They use their legs to stand and climb. They also use their legs to eat and collect pollen. Bees live in many places. They live in Africa, Australia, Asia, Europe, North America, South America. The only continent that bees do not live on is Antarctica! I understand why they don't live in Antarctica. It's too cold! Most of the time, bees are nice to humans. If you do not bother them, they will not bother you. Have fun watching the bees this summer!

Answer the following questions:-

- 1) What are bees?
- 2) How do bees fly?
- 3) How many legs do bees have?
- 4) What is the stinger used for?
- 5) Where do bees live?

Writing Section - (10 Marks)

C. Answer any 1 out of the 2 following paragraph topics.

(5X1 = 5 Marks)

Environmental Degradation

Or,

Global warming

D. Answer any 1 out of the 2 following letter topics.

(5x1 = 5 Marks)

Write a letter to your father requesting him to send you some extra funds for payment of hostel dues.
