

**Bhavan's Tripura Vidyamandir**  
**2<sup>nd</sup> Terminal Examination : (2024-2025)**

**Class:- 7**

**Time:- 3 Hours**

**Name of the student :**

**Subject:- English**

**Total :- 80 Marks**

**Roll No: Section:**

**Reading Section -10 Marks**

**A. Read the passage carefully and answer the following questions**

The desert, with its vast stretches of sand dunes and dry air, can be a challenging environment to live in. Despite the harsh conditions, a variety of plants and animals have adapted to this environment. Cacti, for example, store water in their thick stems to survive the long periods without rain. Animals such as camels can go for days without water, relying on the fat stored in their humps as a source of energy.

In addition to the flora and fauna, humans have also found ways to survive in the desert. Nomadic tribes have developed ways of traveling across the hot, barren land, using camels as their primary means of transportation. These people have a deep understanding of the desert's rhythms, knowing where to find water sources and how to protect themselves from the intense heat of the day and the cold of the night.

**Answer the following MCQ based questions**

**(1X5=5)**

1. What is a characteristic feature of the desert environment?

a) Rainy      b) Cold      c) Dry air      d) Humid

2. How do cacti survive in the desert?

a) By using their roots to search for water  
c) By growing tall

b) By storing water in their stems  
d) By using their leaves for water storage

3. How long can camels go without water?

a) Hours      b) Days      c) Week      d) Months

4. What do camels use for energy in the desert?

a) Water      b) Grass      c) Fat stored in their humps      d) Leaves

5. Who has found ways to survive in the desert?

a) Only animals      b) Only plants      c) Humans and animals      d) Only humans

**B. Read the passage carefully and answer the following questions**

**(1X5=5)**

The forest is home to countless species of trees, plants, and animals. It is a dynamic ecosystem where each organism plays a role in maintaining balance. The towering trees provide shelter for birds, while the shrubs and undergrowth offer food for smaller animals. Some plants rely on insects for pollination, while others produce fruits and seeds that feed various species.

Humans have long depended on forests for resources such as wood, medicine, and food. However, deforestation has become a serious concern in recent years. The clearing of forests for agriculture, mining, and urban development threatens the delicate balance of these ecosystems. Efforts are being made worldwide to conserve forests and protect biodiversity through sustainable practices.

**Answer the following questions -**

1. What is the forest described as?
2. What do trees in the forest provide for birds?
3. What do shrubs and undergrowth provide for smaller animals?
4. What do forests provide for humans?
5. What threatens the delicate balance of forest ecosystems?

**Writing Section - 10 Marks**
